

Saturday 5/16/2009

I have used Mel Corley with "For Your Sign Permit Needs" for over five years now. He has done an excellent job for me during that time. I have had Mel perform site surveys, run permits, obtain city Licenses, process landlord approvals, and meet with customers when necessary. He has performed all of these tasks very professionally and efficiently.

Everyone that uses Mel's services does so because they don't want to put up with all of the waiting in line you encounter at the city. How much will it cost you to run the permits yourself, or have one of your CSRs doing what Mel does?

I personally love that I have not sat in line at any of the cities to get a permit for over 5 years. He is thorough about getting whatever information he needs before he leaves your office. I know that he has had to run in excess of 100 permits for me, with no real problems. And when he has had a problem that was his fault, he has not charged me for the time required to fix it.

I would recommend Mel Corley and "For Your Sign Permit Needs" to any small to medium sized sign company that does sign permitting. A decent sales person can earn more than the cost of Mel's fees selling signs, instead of waiting in line at the city.

Sincerely,

K. Scott Koehler
